

NRG Expert Global Power Plant Database 2013-2014

More than 24,000 power plants in over 180 countries, comprising 80% of global generating capacity

This NRG Expert product is an extensive database that provides thorough intelligence on the world's operational power generation plants. It is an essential tool for finding the specific power mix of the world's nations, specific details on individual plants and details on regional capacity.

- Over 24,000 plants listed by country, fuel and capacity, with further details about individual plants
- The total generating capacity in megawatts of the plants listed in the database amounts to 80% of the world's capacity of 5786 GW
- The plants are classified by fuel (individual fuels or combinations of fuels), fuel group (thermal, hydro, nuclear, RE, hybrid) and capacity MW
- Data is presented in a Microsoft Excel spreadsheet (.xlsx) with separate regional tabs organized by country

Product Scope

Total Number of plants listed by region

Europe	CIS	Middle East	Asia Pacific	Africa	South and Central America	North America
6,099	766	296	6,114	762	1618	9274

- All sections of the industry are covered, including utilities, independent power producers (IPPs) and captive power plants (CPPS)
- The list of plants has been compiled from many sources, including regulator and utility reports and websites, together with magazine and press reports
- Where information is available, further data is included – units and technology, year of commissioning, ownership type (utility, IPP, CPP) and owner.
- Where available, contact information (including telephone numbers and addresses) are also included

Reasons to Buy

- Find the power mix of a region or country
- Find the total nameplate capacity for a region, country or individual plant
- Access extensive contact information listings for individual power plants the world over
- Understand and map the size, scope and growth of markets throughout the world
- Extrapolate the transportation or logistical needs of a region's power industry
- Develop strategies based on the size, composition and type of market
